

INTERNAL COMBUSTION ENGINE TEST STAND - GASOLINE C100/220/A

Year 1
study

Features

- A Regenerative Engine Test Bed fitted with:
- Single Cylinder Four Stroke Gasoline Engine.
- Designed to operate on US style 3 Phase (220V)
- Allows Investigation of Torque-Speed, Power-Speed, Specific Fuel Consumption, Mechanical and Thermal Efficiency Over a Wide Range of Conditions.
- Optional Engines Are Quickly Installed
- Quick connect couplings and broken wheels for ease of movement.
- Able to be tested from adjacent room once engine is set up running.
- High quality efficient engine
- Exhaust extension provided
- Research opportunity to investigate BIO fuels.

Description

A robust floor mounted engine test stand with modular instrumentation and control system. A regenerative dynamometer includes both torque and speed control together with direct reading dynamometer digital display. The dynamometer will accept engines up to 4kW shaft power output.

Engine speed and all relevant temperatures are also displayed on digital panel meters on the remote instrumentation console. Air to the engine passes through an intake orifice and pulsation damper. The flow measurement orifice is connected to a panel mounted manometer to allow differential pressure measurement. Fuel flow is measured using a calibrated volumetric fuel gauge. Each of the optional engines are pre-installed on a standard mounting plate that is designed to allow quick and easy installation on the test bed. Each engine is supplied with a suitable fuel tank and supply system with quick release self sealing fuel couplings.

Operator safety is ensured by a range of interlocks and safety cut out devices.

Learning capabilities

- Measurement of the Torque - Speed and Power - Speed for an Internal Combustion Petrol Engine at a Range of Throttle Settings.
- Measurement of the Specific Fuel Consumption at Constant Speed and Varying Power Output.
- Measurement of Air-Fuel Ratio and Engine Thermal Efficiency at Constant Speed and Range of Throttle Settings.
- Measurement Of Engine Internal Friction At A Range Of Engine Speeds

Technical Specification

- Air-cooled Four Stroke Gasoline Engine
- Engine Maximum output 3.5HP (2.6kW)
- Engine rated speed: 3600rpm
- Engine Displacement: 118cc
- Engine Bore and Stroke: 60 x 42mm
- Engine Cylinders: 1
- Gasoline – Unleaded RON 91 –US-PON 86

Recommended Ancillaries

- C100B

What's in the Box?

- 1 x C100 (Gasoline Engine fitted)
- 1 x Engine Mount
- 1 x Dynamometer console

- Transformer
- Fuel pumps
- Air Supply chamber
- 1 x Engine Exhaust
- 1 x Carbon Monoxide Sensor
- 1 x Stop watch
- 1 x Manometer Fluid
- Instruction manual
- Packing list
- Test sheet
- Spares

Weights & Dimensions

- Weight: 160 kg
- Length: 1900mm
- Width: 600mm
- Height: 700mm

Essential Services

- 210-220 Volts, 3 Phase 50/60Hz (With earth/ground). Line current up to 32A
- Gasoline – Unleaded RON 91 –US-PON 86
