

JET ATTACHMENT INVESTIGATION

F100F

Year 1
study

Features

- Simple attachment to F100
- Very visual experiment
- Compact size

Description

The Optional Jet Attachment Investigation F100F duct has been designed for operation with the Hilton Airflow System F100. The duct allows students to investigate the phenomenon of jet attachment to an adjacent wall and the so called Coanda effect. A rectangular slit directs an air jet towards a Y shaped duct with two outlet passages. The shape of the duct may be changed by tilting and sliding moveable elements. By blowing air from one side or another at the jet the airflow can be directed down either of the Y shaped passages as in a pneumatic flip-flop.

Related Laws/Applications

- Coanda Effect

Learning capabilities

- Investigation of Jet Attachment

Technical Specification

- Jet Depth: 100mm
- Jet width: Adjustable
- Distance of jet from wall: 12mm
- Wall radius: 6mm
- Wall angle: Adjustable
- Edge of Jet to Wall distance: Adjustable

Essential Ancillaries

- F100
- F100A

What's in the Box?

- 1 x F100F
- 1 x Angle Gauge
- 1 x Hex wrench
- Instruction manual
- Packing List
- Test sheet

Essential Services

- F100
